

Introduction

This booklet serves to compile all policies of the Clearwater River Watershed District (CRWD) Board of Managers. Periodically, the CRWD Board has adopted policies by Board action in order to provide direction, guidance and clarify governance for CRWD business. The number of policies created was such that in 2016 the Board instructed staff to compile all policies into a single book to facilitate better policy management. In addition, the Board used the compilation of policies as an opportunity to review and update its policies, and establish a policy review schedule.

The original number assigned to each policy when it was adopted is included in each policy to facilitate comparison to historical records.
